

Brian Sadler

Brian Sadler attended Texas Christian University and studied Electrical Engineering from 1997-2001. He attended the IBEW #22 Electrical Apprenticeship program from 2001-2004, while working in the field at Sadler Electric. Brian received a Journeyman's Electrical license from the State of Nebraska in 2002. He transitioned to a Project Manager and Estimator with Sadler Electric in 2004. Thereafter, Brian received a Contractor's license from the State of Nebraska in 2009, and Master Electrician's and Contractor's license from State of Iowa in 2014. Subsequently, he took over as Owner and operations for Sadler Electric in 2019.

Brian has worked for over 20 years in the Electrical industry in the Omaha Metro area, specializing in Heavy Highway Electrical, Traffic Signal, and signing work sectors. Completing large projects for NEDOT, IADOT, City of Omaha, and other municipal, private, and government entities.

Brian said, "I believe that I would be able to contribute impartial and reasonable input on issues affecting the underground construction industry for Nebraska and surrounding areas based on my previous knowledge and work with key industry stakeholders."
